

M.I. Hummel Rare and Expensive Examples

This is a lengthy list of *some* of the more difficult *M.I. Hummel* figurines to locate and/or afford, most of which have an appraised value over \$1,000. I took the suggested U.S. dollar values of [Robert Miller's last No. 1 Price Guide, the 10th edition](#) published in 2006 and compared it to [Heidi Ann Von Recklinghausen's 2nd edition](#) published in 2013. These are two of the latest esteemed and recognized authoritative books on the recognized worth of the figurines that are available.

This 30-page document was created primarily as a quick reference and should not be used as a substitute for these two books from which you will need to use as the proper authoritative reference. Use it on your cell phone when you run across a questionable figurine you believe to be worth more than the current price tag shows. Visit the website miHummel.org for the latest version of this document.

The Internationals

These 33 figurine samples were created in 1940 by Arthur Möller and Reinhold Unger as samples of other European countries and the children's clothing representative of those countries for possible sale in each of those countries. These are the only figurines that are not typically German in their native costumes but rather developed from sketches by Sister Maria Innocentia of children around the world in their own dress. They were never put into production and only a few samples exist making them extremely rare.

Four Seasons Music Box Series

Limited to four music boxes first released in 1987, the "Four Seasons Music Box" series was limited to 10,000 pieces each, individually numbered, and originally sculpted by master sculptor Gerhard Skrobek and chief master sample painter Gunther Neubauer. The word carving was carried out by the Italian company Anri with the inside of each box fitted with a gold plated 36-note Swiss movement by Reuge. Each piece carries the M.I. Hummel signature on the top wooden carving.

The MELs

These 29 Hummel figurines are classified as the “MELs” since they have those three letters inscribed on the base and are found to be early samples between 1939 and 1940 with three a few years later. Some of these were presented to the Sisters at the Convent for their consideration or they may also be test examples to see how they looked after creating them from the sketches. Apparently, the “Mel” designation must have been a catch-all label intended as a way of marketing these as rejected or even used to designate experimental items. Additional information may be found in Robert Miller’s book, “The No. 1 Price Guide to M.I. Hummel Figurines, Plates, Miniatures, & More...”, 10th Edition on pages 542 through 543.
