

M.I. Hummel Number and Master Sculptors

This document was created as a basic, quick reference to a list of 1,983 M.I. Hummel figurines and assorted other items produced since 1935 bearing a HUM number or otherwise. A few discrepancies may be noticed as to the master sculptor and the date of design due to the variety of sources used. Source material, where the information was located, may be found in the References section at the end of this file. This document is only a quick reference in reflection of the sources on the last page which should be used as your base of information. This list also provides a documented total of at least 1,464,240 Limited Edition figurines, total known pieces, plates, and other items marked as such.

A link is provided to some of the more rare and unusual examples located on the website miHummel.org where photographs and additional information may be found. This text will be updated as new information is located with the latest version available for free download at miHummel.org. Note: Since this is a list that focuses on the M.I. Hummels, the Berta Hummel items will not be included.
